

Core Reference

core name space, version 0.0.15

type identifiers

%lambda	closure lambda
%exception	exception
%vector	vector
%closure	lexical closure
bool	false if \emptyset , otherwise true
char	
cons	
env	
fixnum	fix
float	
function	fn
keyword	key
namespace	ns
null	
stream	
string	str
struct	
symbol	sym
vector	vec

core

load string	bool	load file through core reader
eval T	T	eval form
apply fn list	T	apply fn to list
compile T	T	compile T in null environment
identity T	T	identity function
type-of T	symbol	object type
eql TT	bool	eql predicate

special forms

%defmacro sym list . body	sym	define macro
%lambda list . body	fn	define closure
%if T 'T	T	conditional
%if T T 'T	T	conditional

lists

assq T list	list	assoc
rassq T list	list	reverse assoc
find-if fn list	T	element if applied fn returns an atom, else \emptyset
position-if fn list	T	index of element if fn returns an atom, else \emptyset
drop1 list fixnum	list	drop left
dropr list fixnum	list	drop right
foldl fn T list	list	left fold
foldr fn T list	list	right fold
mapc fn list	list	apply fn to list cars, return list
mapcar fn list	list	new list from applying fn to list cars
map1 fn list	list	apply fn to list cdrs, return list
maplist fn list	list	new list from applying fn to list cdrs
append list	list	append lists
reverse list	list	reverse list

vectors

make-vector list	list	reverse list
bit-vector-p vec	bool	a bit vector?
vector-displaced-p vec bool		a displaced vector?
vector-ref vec fixnum	T	index vec
vector-slice vec fix fix	vec	displaced vector - start, length
vector-type vec	symbol	specialized vector type

macros

define-symbol-macro symbol T	symbol	define symbol macro
get-macro-character char	T	expand character macro
set-macro-character char fn bool	symbol	create character macro
macro-function symbol env	fn	macro expander function or \emptyset
macroexpand T env	T	expand macro
macroexpand-1 T env	T	completely expand macro once

symbols

gensym	sym	create unique uninterned symbol
gentemp	sym	create unique temp symbol

streams

read stream bool T	T	read from stream with EOF handling
write T bool stream	T	write escaped object to stream

xu

predicates		s	macro definitions		s	Reader Syntax	x
minusp fix	bool	negative value	and ...	T	logical <i>and</i> of ...	;	
numberp T	bool	float or fixnum	cond ...	T	cond switch	# ... #	comment to end of line
charp T	bool	char	let list ...	T	lexical bindings		block comment
consp T	bool	cons	let* list ...	T	dependent list of bindings	'form	quoted form
fixnump T	bool	fixnum				'form	backquoted form
floatp T	bool	float	or ...	T	logical <i>or</i> of ...	('...)	backquoted list (proper lists)
functionp T	bool	function	progn ...	T	evaluate rest list, return final evaluation	,form	eval backquoted form
keywordp T	bool	keyword				,@form	eval-splice backquoted form
listp T	bool	cons or ()	unless T ...	T	if T is (), (progn ...) else ()	(...)	constant list
namespacep T	bool	namespace				(())	empty list, prints as :nil
null T	bool	:nil or ()	when T ...	T	if T is an atom, (progn ...) else ()	(... . .) "..."	dotted list string, char vector
streamp T	bool	stream					single escape in strings
stringp T	bool	char vector					
structp T	bool	struct					
symbolp T	bool	symbol					
vectorp T	bool	vector					
streams		xu	rest functions		s	#*... #x... #. #\. #:type ... #:symbol	bit vector hexadecimal fixnum read-time eval char vector struct uninterned symbol
read stream bool T	T	read from stream with EOF handling	append ...	list	append lists		
write T bool stream	T	write escaped object to stream	applyfn ...	T	applyfn to ...		
			funcallfn ...	T	applyfn to ...		
			list ...	list	list of ...		
			list* ...	list	list dot ...		
			mapc fn ...	list	mapc of ...	"` , ;	terminating macro char
			mapcar fn ...	list	mapcar of ...	#	non-terminating macro char
			mapl fn ...	list	mapl of ...		
			maplist fn ...	list	maplist of ...		
			vector ...	vec	make general vector of ...	! \$%&*+- . <>=?[@[] :^_{ }~/ A..Za..z 0..9	symbol constituents
exceptions		n				0x09 #\tab 0x0a #\linefeed 0x0c #\page 0x0d #\return 0x20 #\space	whitespace newline page return space
exceptionp struct	bool	predicate					
raise T sym str		raise exception					
raise-env T sym str		raise exception					
warn T string	T	warning					
with-exception fn fn	T	catch exception
